1. Introduction and instructions

1.1. Purpose of this Request for Proposal

This request for proposal (RFP) is an invitation to submit proposals for a consultancy to work as the TFA Coordinator for Colombia and Peru, implementing, with the support of TFA Regional Director for Latin America, all strategic activities listed below at section 1.5, for a period of 20 months – from the signature to May 2021.

The purpose of this RFP is to solicit proposals from suppliers with expertise in the development of deforestation-free supply chain and jurisdictional’ activities in Colombia and Peru, with a view to meeting high-quality requirements and project objectives established by the Forum. This process will result in the selection of one supplier, who will be invited to enter a contracting phase for a specific and detailed scope of work subject to final fixed pricing.

1.2. About the World Economic Forum

The World Economic Forum is the International Organization for Public-Private Cooperation. The Forum engages the foremost political, business and other leaders of society to shape global, regional and industry agendas. It was established in 1971 as a not-for-profit foundation and is headquartered in Geneva, Switzerland. It is independent, impartial and not tied to any special interests.

The Forum strives in all its efforts to demonstrate entrepreneurship in the global public interest while upholding the highest standards of governance. Moral and intellectual integrity is at the heart of everything it does. The World Economic Forum brings together decision-makers from across society to work on projects and initiatives that make a real difference. Through collaboration between stakeholders with varied perspectives, our projects deliver concrete and sustainable results and make a positive impact at all levels of society. Our comprehensive portfolio of some 50 projects is aligned around the world’s most pressing global challenges, regional issues in the local context, and industry transformations. They are designed to make meaningful and sustainable change.

Since 2015, the TFA – Tropical Forest Alliance has been hosted at the World Economic Forum and has established itself as a neutral convener at the global and local levels, facilitating multistakeholder dialogue and driving collaboration.

1.3. About TFA Global and TFA Latin America

TFA is a global partnership platform working to achieve the deforestation-free production of palm oil, soy, beef and pulp and paper in West and Central Africa, Latin America and Southeast Asia. The Alliance has the collective power of more than 160 partners representing national and sub-national governments, private sector, civil society and other actors, and is designed to foster collaboration to achieve sustainable supply chains.

TFA is composed by global secretariat hosted in Geneva, and 3 regional coordination hubs, based in each of the 3 regions where the key forest countries are located. TFA Latin America, as one of them, is based in Brazil, but its activities reach Colombia and Peru - and the present RFP is fully related with the Peruvian and Colombian strategic activities of TFA Latin America.
1.4. TFA in Peru and Colombia

The Government of Colombia began its formal engagement with TFA in 2016 after three countries – Norway, the United Kingdom, and Germany – agreed to support its efforts to reduce greenhouse-gas emissions from deforestation and degradation of forests (REDD+).

Dubbed the “Joint Declaration of Intent”, the agreement listed several performance benchmarks for earning payments, and TFA 2020 was asked to support two of them – specifically, the establishment of “zero net deforestation agreements with key players from four priority production chains” and the creation of “a public-private coalition of companies committed to ambitious zero deforestation policies(...).”

TFA started the engagement of the Government of Peru in the middle of 2018, and after several high-level meetings, Peru formally adhered to TFA platform in January 2019, to work together on a similar program as Colombia, focused on their own “Joint Declaration of Intent”, and in close alignment with governmental activities on national and territorial levels.

Both countries present tremendous opportunities for forest conservation agenda in Latin America, and TFA can play an effective role with and for them to leverage the impact in an aligned way with region and global results. For that, a consistent local support is required to guarantee the full accomplishment of TFA 2020 Latin America Strategic Plan.

1.5. Purpose, objectives, outputs and activities of the Consultancy

Tropical Forest Alliance (TFA) is soliciting proposals from consultancies with expertise in project management on the field of sustainable and value chain’s development, as well, jurisdictional and territorial approaches, to support the implementation of TFA Peruvian and Colombian workplan, by

- Objective 1: work with the Government of Peru and TFA local partners to reduce tropical forest deforestation associated with agriculture production, combining sectorial and jurisdictional approaches.
- Objective 2: support the TFA activities in Colombia to reduce tropical forest deforestation associated with agriculture production, optimizing the opportunities built in the territory and consolidating good cases and stories to be spread out to the global community.

The outputs and actions are described below, clustered by each TFA Global strategic outcome. The consultancy will work as a local member of TFA Latin America Regional team, contributing to the achievement of the outputs, as a local support that will accelerate and qualify the implementation of the plan. It’ will assess and participate in all the decisions regarding the regional budget allocation and strategic planning detailing/evaluation.
